Gold Fin™, Anti Corrosion

LG's Outdoor Heat Exchanger is coated with a gold-colored anticorrosive epoxy treatment on the aluminum coil, to prevent corrosion. This maintains excellent heat transfer properties of the coil for an extended time, whereas non-Gold Fin™ coils progressively lose efficiency due to surface corrosion. Gold Fin™ fin is perfect for areas with high pollution or locations exposed to saltwater spray from the sea.

Salt Spray Test for 15 Days

Design and specifications are subject to change without prior notice for product improvement.
